Course Objectives

1. To provide professional and industrial standard training which will help the students to understand Matlab IDE clearly
2. To learn programming commands in Matlab
3. To learn Image Processing tool box & project designing
4. To learn the designing of Real World Projects

Course Syllabus

- Introduction to Image processing concepts
- Introduction to the MATLAB
- Important techniques involved in Image processing
- Exposure to detailed concepts of image conversion
- Implementation of real time image processing techniques
- Basic concepts of object identification and tracking
- Demonstration of the Traffic Light Recognition
- Exposure to multi-disciplinary content involved in the building of project
- Exposure to identification of shape, color, tracking of an object
- Hands-on experience for participants with MATLAB programming, Filtering techniques, Image conversion techniques etc.
