

Library Management System

ABSTRACT

Library is the place with the huge collection of books. It is place from where the people issue the books for their reference purposes. But the maintenance of keeping the records of issuing and borrowing is difficult if you use a normal book as a registry. To make this task easier, the library book issue and return system will be very useful. It helps in maintaining the information regarding the issuing and borrowing of books by the by the people in and around the world. Access to one system will change the way the people issue and return the books. The main objective of the Library Management system project is discipline of the planning, organizing and managing the library tasks. Our project aims at making the task of library easy. Library Management is entering the records of new book and retrieving the details of book available in the library. We can issue book to the library member and maintain their records and can also checks how many books are issued and stock available in the library. In the project we can maintain the late fine of library member who return the issued book after the due date. This Library management system project in JAVA and MS SQL server.
